

STS-133 Certificate of Authenticity

This is to certify and confirm *Max the Dog* as an honorary crew member aboard the Space Shuttle *Discovery* during its final mission, *STS-133*, to the International Space Station from February 24 to March 9, 2011.

From her first launch August 30, 1984 until her final landing on March 9, 2011, *Discovery* traversed over 148 million miles in the course of 39 missions, compiling a total of 365 days in Earth orbit; the longest of any spaceship in history.

STS-133 total mission duration was 12 days, 19 hours, 3 minutes, 53 seconds, with 202 orbits around our beautiful planet and a total distance traveled of 5,304,140 miles.
